

Hippo Criticter

*Lurking in 1U
of Rack Space*

With the HippoCriticter Rackmount, you can do everything you can do with its bigger brothers. If you only need to run 4 video layers and you don't need dual/pan output or HD media then the HippoCriticter Rackmount might be the solution for your project. You get built-in Media encoding, full Timeline capabilities, full effects banks, ScreenWarp and PixelMapper, all without compromise. And because the HippoCriticter Rackmount supports full HippoNet functionality it will integrate fully into any project big or small.

The HippoCriticter Rackmount retains all the engine elements so you'll still get rich media playback up to a resolution of 720 x 576 and our highly acclaimed frame-blending too. You also get the addition of built in composite video capture functionality.

Features:

- Class leading video playback and real-time rendering.
- 2 FX engines per layer, 100+ effects per FX engine.
- Frame accurate synchronization across multiple servers.
- Media Manager with live media updating.
- Timeline scheduling against the clock for standalone operation.
- Keystone and ScreenWarp for non-linear projection surfaces.
- Soft-Edge Blending.
- 4 layers (720 x 576) or 2 layers (1280 x 720).
- Unlimited universes of PixelMapper for LED fixtures.*
- Control of external devices via RS232 or TCP/IP.
- Remote management, upload and configuration via HippoNet.
- External control from DMX/MIDI/TCP-IP/RS232.
- Automation component for use with moving staging, truss, etc.
- External 'CriticterPlate included for flexible mounting options.

* Number of universes is limited by hardware.
