

The new Hippotizer V3 R2: Tour-ready custom chassis with additional user-friendly features.

Improvements and new features include:

- Complete new hardware base: New CPU, drives and motherboard.
- Extremely rugged chassis, custom designed for touring and heavy-duty transport. High-grade aircraft aluminum construction; very light yet extremely durable.
- Back panel: Modular system allowing for expansion of features and input cards.
- Front panel: Quick access to USB2 and Firewire ports for easy media loading from external storage devices.
- CPU-controlled fan with temperature sensors, prevents overheating while reducing fan noise to absolute minimum.
- Custom filter system keeps interior clean while maintaining air flow.
- Software dongle housed in dedicated cage, discreet to prevent theft yet easily accessible.
- Multi-color LED system illuminates front panel. Interacts with the Hippotizer software to show clearly when a unit has an error or is unable to start.
- Hippotizer functions now accessed via a front panel multi-line LCD display system. View operational status and change settings without a monitor. Ideal for multi-output systems.
- Hard drives mounted in shock resistant, heavy duty cage. Tour-ready and airfreight-proof.
- Custom card-locking system for accessory and output cards, ensuring physical integrity of the cards and protecting the motherboard from damage.
- Easy access for maintenance.
