## CRMX Nova – The Future of Lighting Control!

CRMX stands for Cognitive Radio Multiplexer. The first automated and adaptive wireless technology specifically developed for the lighting industry! Configure, monitor, set alarms, view the radio spectrum, manage frequencies, and receive feedback from each wireless receiver.

Standard features include:

- Automated Cognitive Coexistence – Smart scanning feature eliminates interference.
- Fail-safe error correction – Triple packet redundancy ensures data integrity.
- Guaranteed 5ms response time – Precise synchronization of all control data.
- Security – Unique 128-bit encryption.

Wide range of models:

- RDM models support 1-2 universes of DMX, RDM, and Ethernet protocols sACN, Art-Net, ETCNet, Pathport, and ShowNet.
- Protocol conversion – New Flex units support any combination of the above protocols, IN and OUT.
- SuperNova RDM visualization software included. Remotely monitor and configure all RDM devices.
